

I'd like to tell you about how great XM Satellite Radio is. I got my XM receiver for christmas, and I have been listening to it since. I love the variety and quality of the music and information I get from it. I've heard music from artisits that I would have would have never heard on local radio. I love the fact that I get to hear the music in the way the artist truly intended it to be heard, not butchered by censory. I gladly pay for this serivce and don't believe that the NAB should be able to control what I'm allowed to hear. I can agree with the fact that they control the local radio that anyone can listen to. I don't have to pay for that, but I do pay for XM Satellite Radio and therefore don't believe that it should be censored or restricted in anyway. When you buy something, you expect to get what you paid for. Because of this, I respectfully urge you to reject the NAB's petition 04-160 so that XM can provide the kind of programming that I demand and deserve.

Thank you,

Jason Comstock
